 Postman Airtable Notion Vim  
 Data Structures Algorithm Design  
 Mentoring Teaching

## Strengths

Oral and written communication

Reliable and consistent

Committed to lifelong learning

Team player

## Projects

### My Little Diary - Android App

[https://github.com/rjifas/my\\_little\\_diary](https://github.com/rjifas/my_little_diary)

An open-source simple diary app built with flutter. Implemented bloc design pattern by separating the project into three layers. The project is completely standardized and follows all the best practices.

### Alpha - Discord/Telegram bot

<https://github.com/rjifas/alpha-bot>

An AI powered discord/telegram bot using google's dialogflow API. The core logic of bot is built as a framework so that it can be used with any bot APIs.

### flat\_3d\_button - Flutter Package

[https://pub.dev/packages/flat\\_3d\\_button](https://pub.dev/packages/flat_3d_button)

A simple 3D flat button with click animation, flat 3d button contains 3 methods, a flat 3d button with any widget as it's child, text as it's child and also an icon as it's child

### FC Times - Android App

[https://github.com/rjifas/fc\\_times](https://github.com/rjifas/fc_times)

An exclusive android app for students of farook college, with department wise timetable, exam notifications, events..etc, my first flutter application project

### TinkerHub FC official website

<https://github.com/TinkerHub-Farook-College/tinkerhubfc-official-site>

Official website of TinkerHub farook college, initiated and lead the website project, completely built from ground up and hosted at [tinkerhub.farookcollege.ac.in](http://tinkerhub.farookcollege.ac.in)
